### **Climate on Tenerife and the Canary Islands**

Tenerife's mild climate and pleasant temperatures all year round make it a perfect place for rehabilitation. During winter it is with approx. 20 degrees Celsius in daytime. During the summer when it is very hot on the Spanish mainland, it becomes very rarely over 24 degrees Celsius in Tenerife. The beautiful city Puerto de la Cruz is located on the northern part of Tenerife, where it is cooler and greener than in the southern part of the island.

### **Accessible accommodation**

We often work with patients who need only accessible accommodation, special facilities and assistance during the holidays. This offers handicapped and physically damaged an opportunity to travel to Tenerife with their family without problems because of their special needs. These patients often use the center as an assisted hotel where they sleep and get help with showers, baths, dressing, etc.

### **Groups**

For groups we can arrange special treatment and rehabilitation depending on their needs and requests. Patients who choose to stay in a hotel are welcome to join our day care and rehabilitation. We can also help to arrange accommodation for relatives at nearby hotels if desired. In addition we can also offer bus and ambulance transportation to and from the airport which is situated only 30 kilometers from the center as well as transportation to and from the hotel. Excursions can be arranged in cooperation with local travel agencies.
